Note: Full Airline Customisation is available on all lifejackets

RFID tagging as standard – ATA Spec 2000, dual memory RFID tags record part number, date of manufacture and serial number. Airlines can utilise the RFID tag to record maintenance dates and asset management data. Survitec are also able to supply a full life jacket asset management system that allows rapid checking of installed jackets without having to inspect under each seat.

All lifejackets stowed / used within a helicopter environment are subject to a 12 month TBO.
