

HELIDECK RESCUE CRASH KIT

Prepare for the worst, expect the best

Our Helideck Rescue Crash Kit is a versatile solution that is fully customisable to meet specific operational and regulatory requirements. The kit is designed for use in the event of helicopter crashes or fires on offshore platforms and vessels.

BENEFITS:

- ✓ Fully customisable to meet your operational and regulatory requirements
- ✓ Watertight chest constructed from Lloyds approved composites to protect against the harshest environments
- ✓ Includes inventory checklist for easy equipment management
- ✓ Conforms to offshore and vessel safety standards and regulations, including CAP437 and SOLAS Chapter II-2, Part G, Regulation 18

“ **Designed to withstand the world’s
harshest environments** ”

TRUSTED TO
PROTECT LIVES

7000740	3.75 m 12 Rung Combination Ladder	*2	PCS
777603	Full Body Harness Rear Attachment	1	PCS
902181	PalmBuddy Gloves MED Size 10 L	**TBC	Pair

*For access to casualties in an aircraft on its side. Please note Cap 437 recommends Ladder (two-piece). This can only be met by providing 2 ladders of min. 3Mtr. Length to EN131 as two piece ladders are no longer available under this standard.

** This equipment is required for each helideck crew member.

***Helicopters being operated in the UKCS incorporate composite materials in their construction. When dealing with incidents involving man made mineral fibers (MMMF), filter masks are strongly recommended. The EN Standard Respiratory Protective Equipment Masks for personnel dealing with MMMF incidents are: EN405:2001 + A1:2009 or EN149:B28.

**** The 4.15M GRAB HOOK would be stored outside of the Storage Chest because of the length. A storage bag (7000742) can be provided for the product if required.

Please note, total kit cost will depend on how many of the per person items are required
