BROCHURE

PROTECTING THE EMERGENCY SERVICES

Your Survival, Our Technology

Survitec is recognised as a leader in the supply, inspection, testing and maintenance of safety and survival equipment. We serve a number of markets including the Commercial, Marine, Offshore Oil and Gas, Aviation, Military, Emergency Services, Renewable Energy and Industrial markets.

Survitec can offer you an extensive range of products and services but this is not all. We are innovators with a passion for developing new products and services, to meet the changing demands of our customers and we pride ourselves on delivering great service.

Although our business interests span many countries and industries, our people share a common focus. We believe in bringing together best-in-class brands so that our customers can benefit from innovative products that have been thoughtfully designed and carefully manufactured to stringent quality standards.

Marine Lifejackets

Bladder Design Technology: Our expert design team constantly push the boundaries in design, keeping you up-to-date with the most advanced technology in lifesaving equipment. Here we outline some of the latest thinking in recent lifejacket designs.

Expert Design All our lifejacket bladders are designed ergonomically for everyday use, but without compromising your survival in the very worst scenarios. In normal conditions, the 3D sculptured shaping gives you maximum comfort and allows you to move freely and without hindrance. However, should an emergency arise and you find yourself in the water, our uniquely designed jackets will inflate quickly and reliably. They have buoyancy distribution to keep your mouth well above the water, known as mouth freeboard, and top-of-the-range turning properties to safely float you on your back. Our inflatable chin support will also help to keep your airways clear.

Premium Material Whether you seek comfort, functionality, approval, reliability, longevity or strength, we have a Crewsaver lifejacket to suit you and your workforce. Our design team carefully chooses the best and most appropriate materials for each product, ensuring the ultimate in

comfort and longevity for the individual environment. We then combine our in-depth know-how with the latest technology to construct quality products which offer you the best possible performance. A great example of this is the Riverseal® fabric that we use in all our lifejacket bladders. Crewsaver was one of the first companies to incorporate this fabric into lifejacket designs, to provide the strongest and most resilient bladders on the market.

- ✓ High abrasion resistance
- ✓ High puncture resistance
- ✓ High tenacity nylon fabric
- ✓ Exceptional tear and breaking strength
- ✓ Approved to ISO-2402, SOLAS, UP and CAA

Unique Chin Support
Tilts your head back to help keep your airways clear

Light*
CSL (Crewsaver surface light) is essential if you are making a long voyage or a night passage. (Available as optional extras on the workvest range)

Firing Mechanism
Pro-Sensor, Hammar or Manual firing systems are available, complete with indicator

Bladder design
A top-of-the-range bladder turns you onto your back, supports your head and diverts waves from your face

Spray Hood*
An optional extra for the workvest lifejackets, with easy pull over tabs and piping to help keep the water off of your face

AIS MOB Device
(Automatic identification system man over-board) Compatible with the S20 Smartfind, AIS MOB Device, essential for anyone going offshore

PLB pocket
For carrying your Fast Find 220 Personal Locator Beacon

Dual lifting beackets
Designed to aid speedy recovery should you fall into the water

Crewfit 275N XD

Constructed using a heavy duty 500D cover to maintain longevity of the lifejacket. An external indicator window* with protective panel and Pro-Sensor or Hammar firing mechanism means the status of the lifejacket can be checked by the user before use.

Key Features

- ✓ Fusion 3D ergonomic shape for comfort and freedom of movement
- ✓ Cover available in Heavy duty 500D cover or wipe clean cover with fabric shoulder panels for easy cleaning and comfort
- ✓ Indicator window with protection panel and Hypalon retainer*
- ✓ Twin waist adjusters
- ✓ YKK tri point quick burst zip
- ✓ Supplied with dual crotch straps
- ✓ The 275N inflation chamber outperforms approval and offers 290N of buoyancy
- ✓ Built-in chin support and twin lifting beackets
- ✓ Manual oral inflation tube for additional air top up
- ✓ S20 AIS and PLB attachment points
- ✓ Reflective tape to aid visibility
- ✓ CSL light attachment point

*On Heavy duty 500D cover option

FUSION 3D

Yellow Wipe Clean

Crewfit 150N XD

Constructed using a heavy duty 500D cover to maintain longevity of the lifejacket. An external indicator window* with protective panel and Pro-Sensor or Hammar firing mechanism means the status of the lifejacket can be checked by the user before use.

Key Features

- ✓ Fusion 3D ergonomic shape for comfort and freedom of movement
- ✓ Heavy duty 500D cover
- ✓ Indicator window with protection panel and Hypalon retainer*
- ✓ Twin waist adjusters
- ✓ YKK tri point quick burst zip
- ✓ Supplied with dual crotch straps
- ✓ The 150N inflation chamber outperforms approval and offers 190N of buoyancy
- ✓ Built-in chin support and twin lifting beackets
- ✓ Manual oral inflation tube for additional air top up
- ✓ S20 AIS and PLB attachment points
- ✓ Reflective tape to aid visibility
- ✓ CSL light attachment point

*On Heavy duty 500D cover option

FUSION 3D

Heavy Duty Red Heavy Duty Navy Orange Wipe Clean Fire Retardant

Heavy Duty Red Heavy Duty Navy Yellow Wipe Clean Orange Wipe Clean

Inshore 380N

As used by the RNLI.

The Inshore 380N has open sides and a versatile adjustment system allowing it to fit most adults. It features 90N of permanent buoyancy, provided by closed cell foam at the front and back, allowing you the maximum freedom of movement to swim and perform a rescue.

Should more buoyancy be required, an additional 290N is available from a manually-operated inflation chamber fitted with a 60 g CO₂ cylinder.

Key Features

- ✓ Tested and developed in collaboration with the RNLI
- ✓ Fitted with a heavy duty cover
- ✓ Light, retro-reflective tape
- ✓ Twin flare pockets
- ✓ Integrated safety harness
- ✓ Spray hood and crotch straps fitted as standard
- ✓ Buddy line
- ✓ Approved to BSEN ISO 12402-2 and BESN ISO 12402-6/DIRECTIVE89/686/EEC

Offshore 290N

The Crewsaver ALB Offshore 290N Lifejacket is a twin-chamber, 290-Newton lifejacket designed, tested and developed in collaboration with the RNLI, ensuring its complete suitability for use by rescue boat crews in offshore and extreme conditions.

A waistcoat style, the Offshore 290N has open sides and a versatile adjustment system allowing it to fit most adults. It has one automatic buoyancy chamber and a second manually-operated chamber. This makes the lifejacket ideal for use in extremely rough conditions, or when supporting a survivor in the water.

Key Features

- ✓ Twin-chamber lifejacket
- ✓ UML MK5I standard automatic inflation mechanism one chamber
- ✓ Halkey Roberts manual mechanism one chamber
- ✓ Supplied with Chest Harness, Twin Hook Safety Line, Flare Pocket, SOLAS/MED-approved light, Spray Hood, Crotch Straps and Buddy Line
- ✓ Approved to BSEN ISO 12402, Directive 89/686/EEC

Evolution 250N

The Evolution 250N is a hybrid, general purpose, waistcoat-style lifejacket designed for working in an environment where frequent water immersion is probable.

Constructed with 60N of inherently buoyant foam, a 190N quick turn inflation chamber provides you with all the benefits of a buoyancy aid coupled with the increased safety of a lifejacket.

Key Features

- ✓ Dual lifting beackets
- ✓ Dual crotch straps with back stowage pocket
- ✓ Back haulage handle
- ✓ Heavy gauge YKK quick-burst zipped chamber cover
- ✓ 2 layer abrasion resistant, wipe clean, foam-lined impact protective chamber cover
- ✓ Dual front cargo pocket
- ✓ Knife sheath pocket
- ✓ Ability to incorporate AIS or PLB systems
- ✓ Reflective tape to aid visibility
- ✓ Optional SOLAS-approved light
- ✓ Universal size suitable for adult sizes

Swift Water Rescue Jacket

This top of the range 80N Jacket is a multi-purpose rescue and emergency response jacket designed to enable carriage of all accessories you need when conducting a swift water rescue, the jacket can be used for rescuing from the water and from small boats. A user-friendly buoyancy aid with waist supports to provide a one size fits all design, making this jacket an easy and efficient choice for the rescue team.

Petfloat

- ✓ Suitable for most breeds of cats and dogs
- ✓ Soft closed cell foam for comfort
- ✓ Easily adjustable and quick to fit
- ✓ Lifting handle
- ✓ Plastic ring for lead attachment

BUOYANCY AIDS

Swift Water Rescue Lite

The lower spec option provides the ideal low cost solution when extra jackets are required, can be stored easily in all basic tenders ready to be distributed in an emergency situation.

Inflation Options

Hammar Automatic

The Hammar Inflator gives excellent protection from random activation caused by moisture, rain or wave splash. This is achieved by protecting the water sensitive element with a hydrostatic valve, which operates when submerged in over 10cm of water and, depending upon the lifejacket style, held there for between 2 to 3 seconds.

- 1 Hammar works on water pressure, only operating when submerged in 10cm of salt or fresh water
- 2 No accidental inflation, even in extreme conditions
- 3 Cylinder is mounted on the inside of the lifejacket inflation chamber
- 4 Re-arming instructions and key provided with each re-arming Pack
- 5 Can also be inflated as manual version or orally

Standard Automatic

This inflation option is available on most Crewsaver inflatable lifejackets. Inflation occurs automatically when the capsule is immersed.

- 1 Capsule fires within 5 seconds of entry into water
- 2 Mechanism pierces cylinder, inflating lifejacket
- 3 Can also be inflated as manual version or orally

Automatic

The automatic inflation system provides the user one point of status indication, to confirm that the unit has been automatically or manually activated. The unit also provides the added benefit of detecting if the CO₂ cylinder has been pierced, eradicating the possibility of accidentally fitting an empty gas cylinder.

Manual

All Crewsaver inflatable lifejackets can be manually inflated, by the pull of a lanyard. This option allows the wearer to swim without the lifejacket being activated automatically. This can be useful if you expect to launch or tend a craft in calm waters.

- 1 Pull lanyard
- 2 CO₂ cylinder is fired
- 3 Lifejacket inflates
- 4 Delivers full buoyancy in approximately 5 seconds
- 5 Can also be inflated orally

Lifejacket Lights

Both automatic and manual options are available with various fitting methods. All lights are MED approved and have a 5 year battery life.

Aviation Lifejackets

Your lifejacket is possibly one of the most important pieces of equipment on board any vessel. When an emergency arises, it is vital to know that the lifejacket you are wearing is reliable, robust and secure. As a supplier of choice to some of the leading Search and Rescue organisations, we strive to ensure our lifejackets meet and exceed the standards of all major international regulatory authorities, including US FAA and European EASA.

MK44

Survitec's Beaufort crew lifejacket for rotary/fixed wing air craft comprises of a fully adjustable waistcoat and a twin chamber inflatable stole which is contained within a protective pouch.

Both the front of the waistcoat and stole pouch are manufactured from 'breathable' flame-retardant fabric, while the back is manufactured from mesh fabric to reduce heat discomfort and fatigue. CAA / EASA approved.

MK51 Aircrew Lifejacket

Developed in response to the CAA CAP 1034 Category 'A' performance guidelines, the new MK51 Aircrew lifejacket comprises of a form fitting waistcoat that enables users to customise pocketary, a slim, unobtrusive lifejacket unit, and a fully integrated Emergency Breathing System (EBS).

Constructed from a durable flame-retardant material, the unique modular design allows users to configure survival pockets for their own individual operating requirements, whilst the slim and ergonomic design allows for maximum comfort and manoeuvrability. The jacket features an option of single or twin inflatable bouyancy chambers. The modular design offers improved maintenance and servicing costs as individual components can be easily removed and serviced.

SONICS Bio-Skin

Lightweight and versatile chemical, biological, radiological and nuclear (CBRN) protection

The SONICS Bio-Skin is a lightweight, discrete and breathable stretch fabric with a unique design that offers exceptional mobility, comfort and protection in a CBRN environment.

Leveraging the very latest GORE® CHEMPAK® Selectively Permeable Membrane (SPM), the Bio-Skin's chemical and biological properties provides maximum protection while minimising thermal burden. Its versatile design easily integrates with many types of outer garments for use in Air, Land and Sea environments. In addition, the GORE® CHEMPAK® Selectively Permeable Membrane used to construct the SONICS Bio-Skin is component certified to meet NFPA 1994, Class 3 current edition standards for 'warm zone' operations.

Key Features

- ✓ Typical fabric system weight is 270 g/m²
- ✓ SPM is air impermeable, the membrane barrier system blocks the penetration of aerosols and particulates
- ✓ Protection even after exposure to BFC's (Battle Field Contaminants)
- ✓ SPM passes the National Fire Protection Standard 1994 Standard on Protective Ensembles for First Responders to CBRN Terrorism Incidents (Class 3)
- ✓ Air impermeable barrier protects even in windy conditions

SONICS Milpod

For portable and contained CBRN extraction

The Milpod is a specialist man portable stretcher used for extraction and treatment of a casualty that has been injured or contaminated in a CBRN environment.

The system ensures the first responder team or the aircraft or vehicle used for the extraction are not contaminated. Constructed from CBRN resistant materials, it is designed for rapid deployment and is easily assembled once removed from its stowage. The Milpod consists of an inflatable base and frame and a casualty envelope, which the casualty is placed into.

Key Features

- ✓ Intuitive deployment reduces risk and enables user to attend to casualty quicker
- ✓ Ergonomically designed for intuitive use. Results in speedier treatment and will therefore save more lives
- ✓ Rapid front line support, resulting in casualties being treated quicker, therefore saving more lives
- ✓ Integrated storage pockets. Ergonomically designed for intuitive use. Results in speedier treatment and will therefore save more lives
- ✓ Rapid front line marine support, rapid casualty treatment/transport, therefore saving more lives
- ✓ Temperature controlled environment / >20 Air changes/minute. Aids patient treatment and comfort
- ✓ Built in Spine Board & Stretcher. Eliminates the need to transfer to other stretcher. Results in speedier treatment and less patient trauma, will therefore save more lives
- ✓ Integrated bodily waist drainage system. Ergonomically designed for intuitive use. Results in reduced contamination risk will therefore save more lives from cross contamination
- ✓ Dual use - Autopsy/Body Bag Envelope can be separated from Air-beam frame, becomes a consumable item and reduces cost burden

SONICS Bioshell

Lightweight and versatile CBRN protection

Gore® Chempak® Selectively Permeable Fabric

Engineered to offer durable and broad protection in chemical and biological situations combined with a reduction in thermal burden. This is achieved by employing an advanced moisture vapour permeable (breathable) ePTFE-based chemical and biological protective film. This barrier technology allows high levels of moisture vapour (perspiration) permeability, while significantly restricting the ingress of a broad range of hazardous chemical vapours, liquids, and aerosols. Thus, delivering durable, broad protection with reduced thermal burden to achieve mission effectiveness.

Improved mobility & operational Effectiveness

The lightweight, thin fabric allows for significant weight and pack volume reduction. The incorporation of stretch panels provides a step-change in overall mobility, which has a direct impact on operational effectiveness. The streamlined design takes advantage of the lightweight and stretch material properties to deliver a more mobile and lightweight garment when compared to historical carbon suits.

Meeting the evolving threat

When considering the recent evolution and use of chemical warfare agents (CWA's) and toxic industrial chemicals (TICs), broader protection is required. This must include protection against:

- ✓ Traditional chemical warfare agents in vapour form
- ✓ Toxic Industrial Chemicals (TICs)
- ✓ Aerosolized particulates (such as contaminated sand)
- ✓ Liquid under force (ie. when kneeling or wearing combat equipment)
- ✓ Biological hazards

Heat Stress Management

The protective fabric is made from a breathable film, which allows moisture vapour to escape. This reduces the thermal burden and improves operational effectiveness. Gore conducted ISO 11092 RET testing on the CPCSU-2 fabric. This testing is the only international standard that focuses on the physiological effects of fabrics. These quantifiable results allow comparisons between fabrics and has been correlated to human comfort by a third party research institute. Testing the CPCSU-2 fabric yielded a result of 8.3 m² P / W, which meets the definition of very breathable.

Removable outer garment allows for reduced logistical burden

Dual flap cover delivers quick protection scalability (easy donning) with improved system protection against particulate, liquid and vapor ingress.

Integrated stretch panels deliver improved mobility, reduced heat stress and increased system level protection

Inner cuffs at the wrists and ankles enhance integration with protective gloves and footwear. Cuffs are easily closed with hook and loop closure straps.

Reinforced elbow and knee regions to ensure continuity of protection during operations.

SONICS

Suits

Keeping your rescue team safe and fully operational in an emergency is critical. To keep them protected, warm and dry Survitec offer a number of suit options including drysuits for flood rescue, search and rescue survival suits for operating both from the air and in the water.

3 LAYER
WATERPROOF
BREATHABLE

Atacama Pro

The Atacama Pro drysuit rivals its namesake desert as the driest place on earth. Designed using 3-layer breathable technology and enhanced waterproof properties to keep you warm and dry whilst out on the water.

Both comfort and style have been extremely important factors in the design of the Atacama Pro. A unique lower stretch mesh back panel, adjustable braces, articulated arms and legs create a custom-fit to provide the ultimate in freedom of movement.

The front entry Aquaseal flexible zip is positioned for maximum comfort and allows the wearer to don the suit without the need of assistance. Additionally, Cordura reinforced double layered seat and knees provides extra protection to the areas of high wear to maintain longevity.

Key Features

- ✓ 3-layer breathable fabric with enhanced waterproof properties
- ✓ Lower back stretch mesh panel for increased comfort and flexibility
- ✓ YKK Aquaseal flexible zip construction
- ✓ Articulated arms and legs for increased freedom of movement
- ✓ Cordura reinforced double layered seat and knees
- ✓ Expandable leg pockets with D-ring attachment
- ✓ Adjustable wrist and ankle cuffs
- ✓ Glideskin neoprene wrist and neck seals
- ✓ Removable braces
- ✓ Internal pocket
- ✓ Reflective detail

3 LAYER
WATERPROOF
BREATHABLE

Atacama Sport

Inspired by the Crewsaver Atacama Pro drysuit, the Atacama Sport is designed using a 3-layer fabric and includes an elasticated waist, adjustable braces and articulated arms and legs creating a custom-fit to provide the ultimate in freedom of movement.

The Aquaseal flexible zip located at the front of the drysuit is positioned for maximum comfort, and allows the wearer to don the drysuit without assistance. Additionally, reinforced seat and knees provides extra protection to the areas of high wear to enhance longevity.

Key Features

- ✓ 3-layer breathable fabric
- ✓ YKK Aquaseal flexible zip construction
- ✓ Articulated arms and legs for increased freedom of movement
- ✓ Reinforced seat and knees
- ✓ Leg pocket with D-ring attachment
- ✓ Glideskin neoprene wrist and neck seals
- ✓ Elasticated waist
- ✓ Removable braces

- Neoprene collar
- Inherently flame-retardant material providing optimum protection against fire
- Exceptional in-water performance and survivability
- Multiple wearer options to support marine and/or aviation transportation
- Reinforced protection on knee, seat and elbow areas

1000 Series Tri-Approved Suit

Designed to exceed the requirements of the latest European aviation and mariner standards, the suit boasts a number of practical attributes enabling the wearer to complete operational tasks, as well as survival characteristics created to protect in the event of an emergency.

The extremely robust suit structure is fully waterproof, breathable and inherently flame-retardant. The interior offers increased insulation against extreme cold and improved thermal comfort with reduced thermal stress.

Key Features

- ✓ Unique tri-approval status, which means that it complies with the marine (SOLAS), aviation transportation (ETSO) and constant wear (CE-PPE) regulations
- ✓ Dual and Tri approved options available

Optional Accessories:

- ✓ Helmet
- ✓ Fall Arrest Harness

1000 Series Front Aircrew Suit

The aircrew suit uses the very latest in technical textile technology to provide the wearer with a number of benefits including waterproof design, breathable and inherently flame-retardant fabric and durable and robust material.

Using technology developed for the NASA space programme, aircrew will benefit from enhanced insulation that regulates the microclimate inside the suit to improve thermal comfort and reduce thermal stress. Hygiene is improved by the use of antimicrobial nano-technology in the thermal liner. The water tight seals at the neck and wrists are stronger, more flexible and less prone to damage making them safer and more effective. New waterproof zipper technology is used to effectively seal the suit ensuring maximum comfort for the wearer.

Rescue Swimmer Immersion Suit

The Rescue Swimmer Immersion Suit was designed in collaboration with first responder emergency services who perform sea and river rescue in cold water climates.

Chequered reflective tape is used for easy identification to civilians and the suit comes with various pocket configurations for multi wearer requirements including equipment pockets for radio. The robust design includes reinforcements on the knee seat and elbow, waterproof plastic zip, internal braces for ease of donning and rescue badge on the reverse for civilian identification.

1000 Series Coastguard Passenger Suit

The 1000 Series Coastguard Suit has been designed specifically for passenger transportation of emergency services personnel. Based on the 1000 Series Passenger suit, the Coastguard Suit has been developed to afford the wearer the same unique benefits of the Passenger suit with an advanced robust heavy duty design.

Manufactured from a waterproof, flame-retardant, anti-static and durable Goretex fabric, the new Coastguard Passenger suit possess a number of comfort and safety critical features. This includes hyper stretch neoprene seals, storm collar/neck/cuff/ankle and epaulet covers, metal and neoprene zip designed to meet the extremely cold temperatures, sofshield knee, seat and elbow reinforcements and internal braces for ease of donning.

1000 Series Rear SAR Winchman Suit

Developed as a high specification garment designed to meet the unique demands of helicopter search and rescue winchmen, the SAR Winchman has a long pedigree in the civilian sector, particularly for use by helicopter aircrews and paramedics servicing the offshore oil and gas logistic support worldwide.

The optimised design offers maximum flexibility and mobility, whilst light, breathable and flame-retardant fabric offers anti-static properties as well as improved comfort and protection, to satisfy the demands of commercial and military helicopter aircrew.

Head Protection & Bags

Torkel Helmet

- ✓ High impact ABS (Acrylonitrile-Butadiene-Styrene) moulded outer shell
- ✓ Multi-adjustable inner cradle for height and head size to ensure a secure, snug fit
- ✓ High density foam lining for impact protection
- ✓ Tough polyethylene ear strengthening pieces
- ✓ Adjustable chin strap

Bute Dry Bag

- ✓ Abrasion resistant, with heavy duty wrap around base
- ✓ Semi opaque ripstop panel for easy location of contents
- ✓ D-ring attachment
- ✓ Available in 5 - 100 litre options

Lifejacket Bag

- ✓ Heavy-duty construction
- ✓ Mesh drain section
- ✓ Side pocket
- ✓ Carry handle and hanging loop
- ✓ Clear PVC card window
- ✓ Large capacity - up to 5 lifejackets

Distress Signals

When rescue is your duty, the products you choose need to go above and beyond, which is why when it comes to quality assurance we are uncompromising in our commitment to deliver robust, reliable and safe solutions which meet the highest standards laid out by our industry regulators. You need our products to perform in the most hostile of environments where anything can happen. No margin for error, they need to work all the time, every time.

Cyalume Light Sticks

- ✓ Word leader in chemiluminescent light for safety and security applications.
- ✓ 5 minute, 30 minute, 8 hour and 12 hour Options available
- ✓ Variety of colours

Red Handflare

- ✓ Approved to the latest Worldwide SOLAS specification
- ✓ Red hand held, short range distress signal used to pinpoint location by day or night
- ✓ Burns for 60 seconds at 15000 candela
- ✓ Features a unique telescopic handle making it very compact and space saving when stowed in a liferaft
- ✓ Easily extended and pull wire operated

White Handflare

- ✓ For use in day and night short range collision warning situations, as a collision warning signal or for illuminating small areas where an intense white light is required
- ✓ Features a unique telescopic handle which makes the signal compact and saves space in stowage
- ✓ Pull-twist-strike mechanism
- ✓ Produces hot white flame for 60 seconds at 2500 candela minimum

Day & Night Handflare

- ✓ Compact, hand held distress signal
- ✓ Emits a red flare 15000 candela at one end, for use at night and day
- ✓ A dense orange smoke at the other end for daytime use
- ✓ Both ends can be fired independently and can be doused in water after firing, allowing the unused end to be stowed until required
- ✓ Housed in a rugged, corrosion & water resistant case

Red Parachute Rocket

- ✓ Designed to alert potential rescue craft
- ✓ Simple operation with rocket projecting to 300 metres at which point a parachute suspended red flare is ejected
- ✓ Burning time: 40 seconds at 30000 candela
- ✓ SOLAS approved

Poly Bottle

The Poly Bottle is a heavy duty, plastic, waterproof container with a robust screw top that is ideal for storing pyrotechnics.

SB Rescue Sling

The SB Rescue Sling is ideal for recovering a casualty from a steep-sided canal or a lake, without the rescuer having to enter the water.

The unit is a highly effective piece of man overboard rescue equipment and has proved popular on pilot boats, workboats, small passenger craft and rescue vessels.

Key Features

- ✓ Can be re-armed in just 20-30 seconds
- ✓ Ease of use, even in severe weather
- ✓ Light weight ensuring ease of manoeuvrability
- ✓ Effective reach in excess of 5 m

Ambulance Pouch

Ambulance pouches for transporting recovered bodies from the water to the mortuary

Fast Rescue Craft

The Fast Rescue Craft (FRC) is a SOLAS approved Man Over Board (MOB) retrieval device, ergonomically designed to assist in the retrieval of conscious and unconscious casualties from the water. Retrieval can be made horizontally without risking further injury to the casualty, or to the rescuer.

The device is available as a complete kit, in two sizes, and is supplied in a robust and highly visible case that is suitable for stowing in the craft. It comes complete with Hypalon patch fixing kits to attach it to either side of the craft.

Constructed from high density plastic rungs and steel rods, it is fitted with Marine Grade 316 stainless steel snap hooks. We have added lifting strops and heaving lines to aid a swift and practical retrieval.

There is a three year servicing requirement for each FRC which is readily available through the Survitec international network.

Key Features

- ✓ Available in two sizes as a complete kit - 3 x 14 or 4 x 15
- ✓ Supplied in a robust, high-visibility valise
- ✓ Compact enough to be stowed in the craft
- ✓ Comes complete with Hypalon patch fixing kits to enable attachment to the inflatable tube on the craft

Rescue Boats

Our rescue boat range includes a number of boat types including fast rescue craft, inflatable and semi-rigid inflatable. Key brands offered within our range include SurvitecZodiac, DSB & Survitec Survival Craft.

Survitec is committed to maintaining the highest of quality standards across our entire product range. Our extensive quality team operates a Quality Management System which complies with all the applicable regulations, such as BS EN ISO 9001:2008 and Marine Equipment Directive (MED) 96/98/EC.

Fast Rescue Boat 600

The Fast Rescue Boat 'FRB' 600 is 6 metres long and can accommodate up to 6 passengers. It is equipped with a self-righting system and can be sling launched with an approved release hook.

This boat features a wheel console with jockey seat, 2 further jockey seats plus additional seating for 2 further passengers and additional space for a full stretcher.

SOLAS approved and distinguished from the RIBO 600 by the addition of a single point lifting frame. Available in engine sizes 75 or 90 HP and supplied with a bow only boat cover as standard.

Key Features

- ✓ 5 airtight compartments; 5 inflation valves; 5 overpressure valves
- ✓ Long shaft length
- ✓ Fuel tanks integrated in crew seats
- ✓ Three-way valve to switch fuel tank or shut off fuel line
- ✓ Dry batteries x 2 (no acid), battery switch and battery charger (1.48 V AC)
- ✓ Bow towing post and on-load release shackle
- ✓ 1 aft towing V with snap hook; 2 towing points on transom
- ✓ Neoprene orange fabric
- ✓ Reflective taping
- ✓ Peripheral rubbing strake
- ✓ Glass-reinforced plastic composite rigid orange hull
- ✓ Hull drainage point

FAST RESCUE BOAT 600

RIBO 600

The RIBO 600 is 6 metres long and can accommodate up to 6 passengers. It is equipped with a self-righting system and can be sling launched with an approved release hook.

This boat features a wheel console with jockey seat, 2 further jockey seats plus additional seating for two further passengers and additional space for a full stretcher.

SOLAS approved and available in engine sizes 75 or 90 HP. Supplied with a bow only boat cover as standard.

Key Features

- ✓ 5 airtight compartments; 5 inflation valves; 5 over-pressure valves
- ✓ Long shaft length
- ✓ 2 bow towing rings on hull
- ✓ 2 towing points on transom
- ✓ 1 bow towing V with on-load release shackle
- ✓ 1 aft towing V with snap hook
- ✓ 2 bow lifting points; 2 aft lifting points on transom; 1 lifting sling
- ✓ Reflective taping
- ✓ Peripheral rubbing strake
- ✓ Glass-reinforced plastic composite rigid orange hull
- ✓ Hull drainage point

RIBO 450

The RIBO 450 is 4.5 metres long and can accommodate up to 6 people. It has a righting system and can be launched using a 4 point sling and approved release hook – SWL > 950 kg and < 1.5 tonnes.

Both SOLAS & USCG approved to meet your regulation requirements. Available in engine size 25 or 40 HP and supplied with a bow only boat cover as standard.

Key Features

- ✓ Can be launched with release hook (safe working load <1,500 kg)
- ✓ Includes wheel console with jockey seat
- ✓ Additional two jockey seats
- ✓ Additional seating for passengers
- ✓ Space available for a full stretcher
- ✓ Single-point lifting frame
- ✓ 70 HP SOLAS-approved outboard motor and additional two 70 litre fuel tanks available as an optional extra

Robust Heavy Duty Inflatable RTB

Boat skin and buoyancy tube made out of UV resistant Hypalon/Neoprene with 4 independent air compartments.

Single point inflation with compressed air (breathing equipment, bottle) is possible. Additional accessories, such as rope, lifting sling set, stowage bag etc are available on request. Different sizes and variations up to aluminium hull based RIBs (Rigid Inflatable Boats) are available.

Inflatable Rescue Boats

Inflatable Boats are available in several sizes including the 420, 470 and 530. Exceptionally lightweight due to ultra-light Hypalon fabric and smaller outboard engine, our boats require smaller davits making transport and servicing easier, more efficient and economical.

Built for a variety of end users including commercial marine and defence organisations, the Survitec Rescue Boats couple operator-friendly, advanced performance capabilities with durability and innovative design.

All SOLAS approved rescue boats are supplied with wooden floorboards. When SOLAS approval is not required aluminium floor boards are available.

Key Features

- ✓ Inflatable deep V shaped keel for improved manoeuvrability
- ✓ Fitted with radar reflector, compass and all standard safety equipment
- ✓ Reinforced Hypalon seams
- ✓ Hypalon fender tube is UV and abrasion resistant
- ✓ Advanced bow design increases internal space
- ✓ Optional anti-skid wooden or aluminium flooring
- ✓ Low weight resulting in easier manoeuvrability
- ✓ Three sizes are available: 420 / 470 / 530

RESCUE BOATS

Lifebuoys & Accessories

Survitec has the in-house expertise to deliver a comprehensive package of lifebuoys and accessories. Key to our range is the Perrybuoy Lifebuoys and associated rescue equipment, including lifebuoy lights, Perry line, heaving line and bracket.

In addition, we can also supply a number of electronic release lifebuoy systems, as well as multiple shore-side housing options.

The Survitec Perrybuoy lifebuoy is supplied to vessels and land-based applications.

- ✓ MED Approved
- ✓ Available in 30" 2.5 kg and 4 kg options
- ✓ Installation height of up to 60 m
- ✓ Fitted with MED approved high-intensity retro reflective tape
- ✓ Grabline high-density polyethylene 10 mm diameter
- ✓ Suitable for lifebuoy cabinets/housings – GRP or rationally moulded polyethylene

Lifebuoy Lights

All Daniamant Lifebuoy lights are designed to deliver, as a minimum standard, the 2 cd output specification and 2 hour duration required by IMO SOLAS regulations.

- ✓ Lights available include L160, L161, L162, L163, L90

LIFEBUOYS & ACCESSORIES

Throw Bag

Invaluable piece of equipment in rescue situations.

- ✓ Tough polyester construction
- ✓ Side release buckle
- ✓ 15 m, 20 m and 25 m options available

Rescue Sling

- ✓ Tough PVC outer fabric
- ✓ 30 metre high stretch line
- ✓ Pre-shaped rescue sling

Throwing Stop

- ✓ Tough PVC outer fabric
- ✓ 30 metre high strength line
- ✓ Stop attached with strong Velcro for ease when stowing and throwing

Stretchers

Our medical, first aid & emergency equipment includes an extensive range of stretchers to suit every need or occurrence.

The range includes

Neil Robertson Standard Rescue Stretcher allows for a simple and safe recovery from a difficult or unconventional situation

Basket Stretcher this basket can be lifted across rough or muddy terrain without affecting the patients wellbeing

Paraguard Excel Rescue Stretcher ideal for search and rescue operations and can be used to rescue casualties from building collapse, industrial incidents and confined spaces

Scoop Model S265 Stretcher designed for first call work, so funeral personnel can uncouple either end, or both ends of the stretcher

Scoop65 Exl enables easy access to awkward low spaces

Combined Space Rescue Stretcher for both horizontal and vertical lifting for confined space and rescue from height

BASKET STRETCHER

SCOOP MODEL S265 STRETCHER

Medical

Survitec offer a wide variety of medical equipment to suit a number of rescue situations. This equipment includes a variety of first aid kits, defibrillators, eye wash stations, emergency showers and oxygen resuscitation equipment.

Marine Liferrafts

In an emergency situation, having the right liferaft can make a significant difference. We have gone to great efforts to offer an extensive range of liferafts to suit every need and situation.

Our Liferaft Range Includes

- Throw-over liferafts
- Davit launch liferafts
- Self righting liferafts
- Open reversible liferafts
- MES systems
- Means of rescue
- SOLAS B ISO Liferaft

Our extensive range are available in various sizes suiting 4 - 150 people per raft. Our friendly sales team can talk through your needs and requirements to help select the right liferaft for you.

ISO LIFERAFTS - VALISE & CONTAINER OPTIONS

THROW-OVER LIFE RAFT

STRETCHERS & MARINE LIFERAFTS

Air Droppable Liferrafts

When an aircraft ditches and the crew and passengers have a matter of seconds to make a decision, it is crucial they are equipped with the very best in lifesaving equipment. In order to improve chances of survival, a liferaft must be designed to incorporate every element specific to an aircraft emergency situation.

Users can select from two types of market leading SAR Liferrafts, the unique Heliraft and the popular Aerolite. This presents a wide choice of capabilities for SAR operations, including military, coastguard, offshore oil industry, commercial aviation and civilian emergency situations.

Key Features

- ✓ Universally adaptable, configured for use on virtually any rotary or fixed wing aircraft.

AEROLITE

Hydrostatic Release Equipment

The standard commercial range of Hammar H20 hydrostatic release units are designed for liferafts from 6 up to 150 persons.

During installation, the white strong rope of Hammar H20 is secured to the liferaft deck cradle and attached to the liferaft lashing with a sliphook. When the release unit is activated, a sharp knife blade cuts the rope sling holding the liferaft to be released. As the ship sinks, the liferaft painter line will be stretched and the liferaft starts to inflate.

N.B. HRUs (HYDROSTATIC RELEASE UNITS) MUST BE REPLACED AFTER 2 YEARS.

AIR DROPPABLE LIFERAFTS

HELIRAFT

Electronics

The McMurdo range of products provide professional and recreational mariners, fishermen, light aircraft pilots and those involved in outdoor adventure activities with the very best chance of being found without delay in the event of an emergency.

Fast Find 220 (with GPS)

- ✓ Designed for marine enthusiasts and adventure
- ✓ 6 year battery life
- ✓ Safe stow antenna
- ✓ Floats with buoyancy pouch
- ✓ Transmits on 406 and 121.5 MHz
- ✓ Global emergency alerting via COSPAS-SARSAT satellites
- ✓ Neck lanyard included
- ✓ Universal pouch included

Smartfind S20

- ✓ Provides accurate position information to assist fast recovery
- ✓ Transmits GPS target tracking information over AIS
- ✓ Compatible with plotters and onboard navigation systems
- ✓ Compact, 120 g and designed for life jacket use
- ✓ Special TX ID transmitted every minute
- ✓ Flashing LED buzzer
- ✓ Minimum 24 hour continuous operation
- ✓ 7 year battery life
- ✓ Fast transition, typically after 15 seconds
- ✓ Waterproof

AIS Beacons Smartfind S10

- ✓ Manually activated personal safety device to aid recovery
- ✓ Transmits GPS target tracking information over AIS
- ✓ Small and light for easy carriage
- ✓ Waterproof, buoyant and fully submersible to 60 metres
- ✓ Flashing LED light
- ✓ Minimum 24 hours continuous operation
- ✓ 5 year battery storage life

Handheld Radio GMDSS VHF Pack A R5

- ✓ Dimming and backlight control
- ✓ Battery indicator and battery saving function
- ✓ Quick channel select button
- ✓ Keypad lock
- ✓ Rotary volume control
- ✓ MED (Wheelmark) FCC approved
- ✓ Pack A - full featured option
- ✓ Battery storage and charger available

E5 Smartfind

- ✓ Internationally approved
- ✓ Transmits on 406 and 121.5 MHz
- ✓ Non hazardous battery
- ✓ Unique CARRYSAFE bracket available
- ✓ High brightness LED flashing locator light
- ✓ Transmits for 48 hours once activated
- ✓ 5 years battery life

5 years warranty
Manual bracket and SOLAS approved auto housing options available

Smartfind Aid SART S5

- ✓ Internationally approved
- ✓ Waterproof to 10 m
- ✓ Buoyant
- ✓ Compact and lightweight
- ✓ Non-hazardous battery for safe and easy transportation
- ✓ Minimum 96 hour operation battery life
- ✓ Visual indication of operation

Accessories

Grab Bag

- ✓ Designed for marine and land use
- ✓ Waterproof and buoyant
- ✓ Perfect for holding emergency equipment
- ✓ High visibility

Grab Bag XL

- ✓ Designed for marine and aviation use
- ✓ Waterproof and buoyant
- ✓ Perfect for holding emergency equipment
- ✓ Carry handles and shoulder strap
- ✓ Watertight zip and Velcro closure
- ✓ External EPIRB (emergency position indicating radio beacon) pouch and flare stowage pockets

G5 Smartfind Plus

- ✓ Internationally approved
- ✓ Transmits on 406 and 121.5 MHz
- ✓ Non hazardous battery
- ✓ Unique CARRYSAFE bracket available
- ✓ High brightness LED flashing locator light
- ✓ Transmits for 48 hours once activated
- ✓ 5 years battery life
- ✓ High performance multi-channel integral GPS giving a typical location accuracy of less than +/- 62 m

5 years warranty
Manual bracket and SOLAS approved auto housing options available

Rescue SART S4

- ✓ Ship or survival craft options
- ✓ Waterproof to 10 metres
- ✓ Buoyant
- ✓ Compact and lightweight
- ✓ Replaceable 5 year battery pack
- ✓ Audio/visual indication of operation
- ✓ Built-in test facility
- ✓ Integral lanyard

MAINTENANCE LIFTING SYSTEM

RESCUE CUSHIONS

FAST INFLATION TENT

FAST INFLATION SHOWER

Tooling

Survitec is a major supplier of power tools to emergency services teams worldwide. It distributes, services and repairs hydraulic, pneumatic, electric and battery-powered rescue tools that can be purchased outright or hired.

Vertical Lifting Wenches

Designed to extricate victims of road traffic accidents by spreading vehicle structures open, Survitec's hydraulic vertical lifting wedge has huge lifting force, even in extremely small access gaps.

Horizontal Lifting Wedges

Compatible with Enerpac's RC series of ten-tonne hydraulic cylinders, the single-acting, spring return WR series of horizontal lifting wedges are extremely capable in very confined work areas.

Saws

Survitec supplies and services handheld circular and sabre power saws, including cordless ranges manufactured by Metabo and Trumf Tooling. All power saw products have a manufacturer's warranty.

Lighting

Survitec's cordless battery-powered site lighting equipment is ideal for emergency operations, providing uniform LED illumination in large working areas for up to seven hours when fully charged.

BESPOKE INFLATABLES & TOOLING

Bespoke Inflatables

Maintenance Lifting System

Survitec manufacture lifting cushions for vehicles, tanks and aeroplanes, with a lifting capacity ranging from 100 kg to 59875 kg.

Rescue Cushions

Our light weight and easily storable inflatable frame supports an outer cover made from highly durable fabric coated with flame-retardant PVC. The patented design self inflates in just 30 seconds making it ideal for emergency situations, and with an improved lifetime of 15 years guaranteed, our customers can be confident in the products' consistency. Over 5500 units have been sold to a diverse range of end users, including the Berlin Fire Brigade who operate approximately 170 Survitec rescue cushions. The rescue cushions come in four sizes that meet the approved rescue heights of 16 m, 23 m, 30 m and 40 m.

Fast Inflation Shower

Survitec has designed and manufactured high-grade fast inflation showers to suit every obligation. Our innovative concept incorporates a fast inner over pressure air system which allows no polluted air to enter the unit, enabling first responders to use as a decontamination unit. Used by the Swiss Military, the fast inflation shower can be retracted quickly and be reused immediately if required.

Fast Inflation Tent (FIT)

Capable of widespread customisation in design, shape, colour and accessories, this product offers extensive adaptability, making it suitable for a variety of uses. Lightweight with small stowing dimensions and an inflation time of a mere 40 seconds, the Survitec Fast Inflation Tent is the ideal solution for emergency situations. Used previously as temporary field hospitals, military headquarters and refugee accommodation, the Survitec Fast Inflation Tent is a truly adaptable and distinguished product for today's first responder.

Height Safety

We offer an extensive range of height safety products and services. As approved suppliers and service agents for the leading brands of fall protection equipment, you can trust our knowledge and expertise to help you select the best products on the market today.

Personal Fall Protection Equipment

- Anchors
- Harnesses
- Lanyards
- Work restraint systems
- Positioning systems
- Connectors
- Fall arrest blocks
- Fall arrest recovery blocks
- Slings
- Tripods
- Confined space equipment

Our Suppliers Include

- Capital Safety
- Honeywell / Sperian
- Ridge Gear
- Tractel

Rescue Systems

- Evacuation systems
- Self rescue systems
- Assisted rescue systems
- Stretchers and associated equipment

Installation, Servicing & Inspection

- System installation
- Servicing
- Fixed system inspections
- PPE inspection
- Systems training
- Hire

Training

- Theoretical and practical modular programs with certification

A Selection of Products Include

1. Tripod
2. Winch
3. Rollgliss Hand Winch
4. Rope Control Devise
5. Helmet
6. Rope Bags
7. Rollgliss R350 & Rope Rescue
8. Rollgliss R500 Rescue
9. Rollgliss R520 Rescue
10. Rope Access/Suspension Harness
11. Rescue Harness
12. Double Lanyard
13. Positioning Lanyard
14. Anchor Slings
15. Galv Steel Sling
16. Karabiners (alloy Triple lok)
17. Pro Line

Lifting & Inspection Services

Raising the standard

Survitec's focus is on quality assurance, robust procedures and detailed process controls, while working in partnership with regulatory authorities and understanding compliance. Survitec provides through-life-management to ensure equipment always operates reliably and safely.

Our lifting compliance team offers cost effective and bespoke solutions for all lifting requirements from product sales to site survey design and manufacturing. Our engineers are trained to the highest standards and have prerequisite industry qualifications, LEEA based competency portfolios as well as the required NDT/offshore certifications.

Slings

Design, Fabrication & Supply of

- ✓ Wire Rope Slings
- ✓ Chain Slings
- ✓ Polyester Round Slings
- ✓ Flat Web Slings

Manufactured to customer specifications in accordance with relevant industry standards.

Lifting Appliances

Supply, installation & service of lifting appliances across all industry sectors providing innovative lifting solutions through trusted brands.

Lifting Accessories & Components

Supplying the Global Brand Leaders for

- ✓ Shackles
- ✓ Master Links
- ✓ Hooks
- ✓ Lifting Eyes

Testing

Providing on-site testing for Lifting Equipment & Supporting Structures

- ✓ Calibrated Load Testing
- ✓ Destructive Testing
- ✓ Magnetic Particle Inspection
- ✓ Dye Pen
- ✓ Deflection Testing

Crane Engineering Services

- ✓ Supportive planned preventative maintenance & reactive engineering support for crane types and manufacturers
- ✓ Installation of new crane structures
- ✓ Fabrication of existing structures to support customer needs

LIFTING & SAFETY SIGNS

Safety Signs & Posters

We can supply a range of safety signs, photoluminescent tapes, posters and manuals to suit your vessel / workplace requirements.

SAFETY POSTERS

SAFETY SIGNS

THUNDERFLASH

HANDSMOKE

TRAINING DUMMY

COLOURED SMOKE GRENADE

TRAINING EQUIPMENT

Training Equipment

We can supply a range of training equipment for use on board a vessel or for shore-based training including liferafts, pyrotechnics, electronic equipment and rescue dummies.

Coloured Smoke Grenade

Employing vivid colours and dense smoke emission, this training aid provides the optimum signalling performance required by operational troops. Available in orange, white, yellow, red, green and blue.

Grenade Hand Smoke Screening N150

Adopting a low toxicity formulation the N150 can be used in training situations without posing a health hazard or damaging the environment.

Thunderflash

A pyrotechnic composition designed to simulate battle noise during training exercise.

Flotation Rescue Equipment Dummy

FRED has been designed for use as a flotation rescue dummy with positive buoyancy for simulating marine rescues.

Rope

Survitec can supply a wide range of rope products to the Emergency Services for both inland and offshore rescue.

Key rescue organisations such as the RNLI, MCA, fire & rescue authorities and police have all chosen Survitec as their supplier of choice.

Additionally, our capabilities also extend to visual inspection and destructive testing.

Key Products

- Staple-spun polypropylene
- Heat-resistant Kevlar
- Nylon and polyester braided climbing rope
- Dyneema and nylon towing lines
- Elastic shock cord
- Natural fibre ropes

Training & Consultancy

CUSTOM MADE DRYSUITS FOR THE ITALIAN FIRE BRIGADE

Training

Safety equipment is becoming ever more technical. Learning how to use and maintain it correctly is an important, but often complicated, process. We therefore offer a complete training service, to ensure you have the correct understanding of the products, so that they can be employed effectively and maintained appropriately. This all helps to prolong the life of your essential equipment, keeping it fit for purpose whenever it is required.

Rental

At Survitec, we are always working closely with our customers to help provide solutions to the challenges they face in the constantly changing, global environment.

Over the past couple of years, the majority of our clients have expressed that they no longer see the procurement of lifesaving appliances as buying a product, but rather as fulfilling the need for a holistic safety solution. As a world leading manufacturer and service provider of critical safety equipment, we have introduced the Survitec Global Services programme to the marine market, with liferaft hire being the cornerstone of this integrated programme.

Survitec Global Services can also offer lifejacket, lifting and testing equipment as well as immersion suit rental packages, whereby customers enjoy both immediate and long-term benefits, knowing they are fully backed by the global service station support network.

Design & Consultancy

Our design team are always happy to work with clients to create products to meet their specific needs. As evidenced in our work with the Italian Fire Brigade, we can work to accommodate specific standards, regulations and/or environments and custom make certain products, where necessary.

Italian Fire Brigade

We have been working with the Italian Fire Brigade for over 6 years, designing and custom making their dry suits to specifically cater for their needs. We supply over 300 dry suits per year, adjusting the specifications as required.

Custom made vibrant colours to specifically cater to the Italian Fire Brigades uniform colours.

Service Stations

- ✓ Strategically located service stations ensure minimum delay in the delivery and collection of equipment
- ✓ All Survitec service stations are quality controlled and audited at least once every three years
- ✓ Our service stations are required to stock a quantity of approved spare parts
- ✓ Only approved and trained service engineers are authorised to carry out work
- ✓ Service engineers must attend refresher courses once every three years
- ✓ Training, audit and certification records are tracked through a global servicing database to maintain consistently high servicing standards

SERVICING

Servicing & Maintenance

MES, Liferaft, Lifejacket, Lifeboats, Rescue Boats & Immersion Suits

At Survitec we recognise that when it comes to safety there is no margin for error or complacency. We carry out regular and rigorous servicing and maintenance at our stations globally to ensure that our customers have the best and most reliable survival products on the market.

As well as standard servicing, we carry out both major and minor repairs to rescue boats, liferafts and lifejackets. We have our own in-house cylinder bays and engineering workshops where we investigate the condition of equipment prior to carrying out any extensive repairs. In order to provide a rapid service turnaround, Survitec's stores hold a host of components and spare parts, all of which are fully documented and traceable.

We have a strong reputation for reliability of service and workmanship. Our work is always of a high standard and our technical ability is continuously being upgraded with the latest equipment, facilities and training.

Servicing Capability

- ✓ Regular servicing of liferafts, lifejackets, marine evacuation systems (MES) and survival suits
- ✓ Major and minor repairs to liferafts, lifejackets, MES and survival suits
- ✓ Inflatable tube and glass fibre hulls repairs for rigid inflatable boats (RIBs) and rescue boats
- ✓ Testing and refilling of gas cylinders
- ✓ Each service certificate printed with a unique code to record where a service has been carried out
