L90

LIFEBUOY LIGHT ↓

The L90 uses tried and proven alkaline battery technology. These batteries are widely available and they should be replaced on an annual basis. 60 metres drop height SOLAS/MED standards call for approved lifebuoy lights to be able to withstand a drop from 30 metres. The robust and well constructed L90 has passed a drop height from 60 metres, making it suitable for the many higher bridge wings and decks on vessels today.

Mounting made easy, The L90 uses a unique mounting bracket, that enables easy fitting in all locations. The bracket is available separately if required.

Low cost transportation due to the alkaline batteries being non-hazardous and can therefore be transported without restriction and at a lower cost. The L90 can also be supplied without batteries, to lower transport costs even further. The batteries can then be sourced and fitted locally.

FEATURES

- ROBUST AND RELIABLE
- AUTOMATICALLY ACTIVATED AFTER RELEASE FROM THE BRACKET
- SUPPLIED COMPLETE WITH A 1M LANYARD
- CAN BE SUPPLIED WITH OR WITHOUT ALKALINE BATTERIES
- SOLAS/MED APPROVED

The L90 uses a unique mounting bracket, that enables easy fitting in all locations

L90 LIFEBOUY LIGHT

TECHNICAL DATA

Light Colour	Orange
Bracket Colour	Black
Light Output	2 Candela minimum
Light Duration	2 hrs minimum
Light Type	Filament Lamp
Light Material	High Density Polyethylene (HDPE)
Bracket Material	High Density Polyethylene (HDPE)
Lanyard	Supplied with a 1.0 m long Lanyard
Storage Temperature	-30 ° C to + 65 ° C
Operating e Temperature	-1 ° C to + 30 ° C
Drop Height	60 metres. SOLAS regulations state a minimum of 30 metres
Light weight	1250 g
Bracket Weight	100 g
Battery Type	5 off alkaline Cells used per light. Replace annually with approved Cells. Uses LR20 – 1.5 volt
Activation	Self-activating via a tilt switch
