

# WHY CHOOSE CREWSAVER LIFEJACKETS

# OVER 60 YEARS OF PIONEERING LIFEJACKET TECHNOLOGY

A large percentage of the boating world still do not wear lifejackets. As a manufacturer of performance safety equipment, our challenge is to reduce this number through the design of comfortable and stylish lifejackets, whilst increasing the key safety features for vital in-water performance.

Whatever your activity, be sure to choose your lifejacket carefully. Whether you are selecting for yourself, your family, your crew or your colleagues, you should consider worst-case scenarios and the type of lifejackets everyone should be wearing for their ultimate safety overboard.

Our popular Fusion 3D collection consists of ErgoFit and Crewfit lifejackets, so whatever your level or activity - there is a Crewsaver to suit.

**EXOLOK**  
All Crewsaver lifejackets are fitted with our EXOLOK

system. EXOLOK provides increased security for gas cylinders attached to your lifejacket operating mechanisms. A simple yet innovative design, EXOLOK holds your lifejacket cylinder securely in position and provides a clear indication if the cylinder moves, becomes unscrewed or is tampered with.

## Fusion 3D

Our lifejacket range encompasses the most innovative Fusion 3D technology, providing you with the most advanced comfort solutions available. The Fusion 3D designed lifejacket sits off your neck, ensuring you are unhindered and provides superior comfort with advanced levels of safety – so comfortable you'll forget you are wearing it.

## Halo hood system

It has been proven that the addition of a spray hood inside a lifejacket can significantly enhance your safety. It increases visibility, retains heat and protects your airway. Our ErgoFit+ features the halo hood system - an industry first designed for elevated airway protection. This is achieved through improved bladder and spray hood compatibility, and a new double halo construction. As a result, the spray hood is fully self-supporting once deployed and sits significantly higher above your face.

COMFORT. STYLE. PERFORMANCE.

## SAFER BY DESIGN

- We design, manufacture and supply high-performing lifejackets with an origin tracing back to 1957. Our trailblazing designs are trusted by operators, watersports enthusiasts, sailors and athletes around the world.
- Our design experts specialise in flotation technology. We work closely with high-performance sailors, lifeboat crews and even helicopter aircrew. So whether it's a lifejacket for the Royal National Lifeboat Institution (RNLI) or a buoyancy aid for a day out on your paddleboard or high-performance sailing dinghy, we provide the safety equipment so you can focus on getting out there and doing what you (and we!) love.

Crewsaver®

# ERGOFIT<sup>+</sup> IT'S WHAT'S INSIDE THAT COUNTS

Using our ErgoFit lifejacket as an example, we demonstrate the essentials of lifejacket design complete with a guide to our very latest safety features. This will help consolidate your knowledge and allow you to identify the features you need for your own specific use. Then simply pair up the features with our comprehensive lifejacket range as shown on our website to select the very best model for you.

\*For maximum protection in severe weather conditions / when wearing heavy waterproofs / when help is far away, we recommend opting for a 275N rated lifejacket, such as the ErgoFit+ 290N

# THE ONLY COMPLETE 3D LIFEJACKET RANGE

From a cruise around the harbour to racing across vast oceans, we have a lifejacket for you. Our expert design team choose the best and most appropriate materials for each lifejacket to ensure the ultimate in comfort, performance, reliability and functionality.
