

MK10 SKELETAL ANTI-G SUIT

Protection against G on training and operational fast jet platforms

The MK10 Skeletal Anti-G Suit delivers pressure to the abdomen, thighs and legs in direct proportion to the g-loading experienced, enabling pilots to sustain up to 7G and ensuring they can maintain full situational awareness and exploit the full performance of the aircraft.

BENEFITS:

- ✓ Approved on multiple platforms including Hawk, Tucano, PC-9, PC-21 and others
- ✓ Available in Sage Green, NATO Green and Sand
- ✓ Easily reconfigurable for left or right hand air supply
- ✓ Eight standard sizes plus special measure option for optimum fit, male and female
- ✓ Adjustable lacing for maximum comfort and ability to wear summer or winter schedules without garment refitting
- ✓ Removeable thigh pockets for flight documents and equipment
- ✓ Manufactured from hard wearing fire retardant Aramid fabric
- ✓ Simple maintenance requirements minimises logistics burden

“ **Protecting your most valuable asset** ”

TRUSTED TO
PROTECT LIVES

MK10 SKELETAL ANTI-G SUIT

Bladder facilitates air passage to assist inflation. Extends across the abdomen and down each leg to ensure high manoeuvrability with up to 7G+ protection

Reinforced inflation hose delivers air into bladder

Removable mounted pockets for stowage of flight related documents and other relevant equipment

Constructed from fire retardant Aramid fabric

Single sliding fastener which extends down the full length of the leg to assist donning
