

# COLD WEATHER PROTECTION ENSEMBLE

Exceptional protection from adverse weather conditions

Our Cold Weather Ensemble protects military aircrew exposed to the most extreme environmental conditions. The ensemble can be configured to provide appropriate levels of protection ensuring mission flexibility across all climates and conditions.

## BENEFITS:

- ✓ Keeps military aviators warm and dry in adverse conditions
- ✓ Designed for reduced bulk whilst maximising waterproof-ness, comfort, and mobility
- ✓ The jacket is available in two insulation levels to provide optimum protection in different climates
- ✓ Breathable fabric protects from snow, rain and wind whilst allowing evaporation of perspiration
- ✓ Waterproof pockets and optional balaclava with features to reduce frostbite risk
- ✓ Fully compatible with the range of Survitec thermal protection mid and base layer garments
- ✓ Qualified for fast jet, rotary wing and transport aircraft operations, constructed from inherently flame retardant fabrics

“ Adjustment in key areas for maximum comfort ”

TRUSTED TO PROTECT LIVES

# COLD WEATHER ENSEMBLE

## TECHNICAL DATA

### JACKET AND TROUSERS

<b>Wide Range of Sizes</b>	18 Standard sizes
<b>Thermal protection options</b>	Jacket available in two levels of thermal protection using PrimaLoft® Synergie high performance insulation
<b>Water and wind proof</b>	Jacket - Durable Gore® bi-laminate material Trousers - Durable Gore® Tri Lamine material with MVP membranes for breathability
<b>Superior design</b>	Maximum wind and water resistance, comfort, mobility and garment longevity. Fully washable
<b>Qualification</b>	Approved for aircraft use including flame resistance
<b>Compatibility</b>	Integrate with fast jet PFE and thermal base/mid layers

Optional balaclava stowed inside pocket

Internal comfort collar

No seams over shoulder for improved waterproofness

Concealed front pockets for equipment and glove stowage, fully insulated for hand protection

Unique rainwater channelling to aid keeping hands dry

High waist trouser design to give generous overlap with jacket

Waist adjustment tabs for optimum fit

Water resistant hip pocket for equipment stowage and hand protection

Waterproof collar that is closed to maximise protection

No seam across back to minimise risk of water ingress

Internal spacer fabric lining to encourage airflow even when seated

Inner hood for stowage of balaclava

Adjustable braces to hold trousers in position for optimum comfort

Additional insulation for lower back and kidneys
