

THERMAL PROTECTION GARMENTS

Protection from extreme weather

Our thermal protection garments protect military aircrew from extreme environmental conditions. Available in three configurations to provide maximum protection offering mission flexibility in all climates and conditions.

BENEFITS:

- ✓ Keeps military aviators warm and dry in adverse conditions
- ✓ Fully compatible with the range of Survitec thermal protection mid layer and over garments
- ✓ Qualified for fast jet, rotary wing and transport aircraft operations
- ✓ One piece garment for quick and easy donning
- ✓ Loop holes for thumbs and feet to ensure optimal fit
- ✓ Suitable for male and female aircrew
- ✓ Simple laundering/maintenance procedures
- ✓ Comprehensive size roll

“ **Comfortable base layer garment to provide excellent protection in cold conditions** ”

TRUSTED TO
PROTECT LIVES.

THERMAL PROTECTION GARMENTS

ORDERING INFORMATION

Part number	Description		Size
1007832	TPG Shortie example	A3796	2A
1007852	TPG Longie example	A3797	2A
1007872	TPG Combie* example	A3798	2A

* Combie adds a second layer of insulation to the torso area

Material resists compression exerted during immersion, maintaining excellent levels of thermal insulation

Two way sliding fastener for easy donning and doffing

Streamlined design to ensure no interaction with other items of clothing

Comfortable 4-way stretch material

Lightweight Polartec polyester material provides excellent insulating properties and comfort

Elasticated thumb loops at cuffs prevent sleeves moving during donning of garments over the top

Elasticated foot loops at ankles prevent legs moving during donning of garments over the top

**TPG Longie -
Long arms and legs**

**TPG Shortie -
Short arms and legs**

**TPG Combie -
Enhanced thermal
protection in torso area**
